Abstract

Computers have been used quite widely for educational purposes. There are many software and websites designed to help teaching and learning process. As a 'newcomer' in the virtual world, Second Life (SL) has been used for different purposes, including education and language learning. In this article, I will describe present uses of SL in education. I will also discuss the challenges and advantages in using SL in education. Finally, I will recommend briefly the use of SL to aid language learning.
