

Abstract

During this current pandemic of Covid-19, online learning or online school is very important for high school students because they have not been allowed to going to school to take part in offline school as usual. The existence of E-Learning or Electronic Learning facilities will greatly help students to get material or theory in the form of lessons and information from internet. As the Minister of Education emphasizes the implementation of online schools, more and more parents are begin to facilitating their children with smartphones, so that students can join the online class or searching the subject on the internet. There are many online platforms that provide these things, one of which is the website. However, there are still many website whose display or the user interface is not very attractive to students because their construction has not been designed properly and optimally. By using the Heuristic Of Responsive Web Design method as a benchmark to make this e-learning website, hoped that the website design and purpose will be fulfill the need and expectations of students who want to find lessons material and want to learn by online.

Abstrak

Pada masa pandemi Korona-19 saat ini, pembelajaran secara online sangatlah penting bagi para siswa SMA/SMK karena pelajar belum boleh masuk ke sekolah untuk mengikuti pembelajaran *offline* seperti biasanya. Maka adanya fasilitas *E-Learning* atau Pembelajaran Elektronik akan sangat membantu siswa dalam mendapatkan materi berupa pelajaran maupun informasi secara *online*. Seiring dengan semakin ditekankannya penerapan sekolah online oleh Menteri Pendidikan, maka semakin banyak pula orangtua yang memfasilitasi anaknya dengan *smart phone* agar siswa dapat mengikuti sekolah daring ataupun mencari materi pelajaran di internet. Ada banyak platform *online* yang menyediakan hal-hal tersebut, salah satunya adalah *website*. Namun, masih banyak *website* yang tampilan atau *user interfacenya* tidak terlalu menarik untuk siswa karena pembuatannya belum dirancang dengan baik dan maksimal. Dengan menggunakan metode *Heuristic Of Responsive Web Design* sebagai patokan pembuatan *website e-learning* ini, diharapkan *website* yang dirancang dan dibangun akan sesuai dengan harapan para siswa yang ingin mencari materi dan ingin belajar secara *online*.

Kata Kunci: *E-Learning, Website, User Interface, Heuristic Of Responsive Web Design*
