

## Abstrak

Penelitian ini bertujuan untuk mengetahui hubungan antara tingkat pendidikan ibu dengan berpikir kreatif siswa kelas XI Sekolah Menengah Atas Kristen I Salatiga. Dalam penelitian ini menggunakan teknik *random class* dengan subjek penelitian berjumlah 112 subjek di kelas XI SMA Kristen I Salatiga. Alat yang digunakan untuk pengumpulan data adalah Tes Kreativitas Figural. Analisis data dengan menggunakan teknik analisis *Spearman rho* dan diperoleh hasil  $r = -0,028$  dengan signifikansi  $0,771$  ( $p < 0,05$ ). Hasil penelitian ini menunjukkan bahwa tidak ada hubungan antara tingkat pendidikan ibu dengan berpikir kreatif siswa.

Kata Kunci: *berpikir kreatif, tingkat pendidikan ibu, siswa, SMA*

## Abstract

The main objective of the study was to find out the relationship between mother's educational level and student's creative thinking at class XI of Christian Senior High School Salatiga. A total number 112 students participated in the study. Participants were selected using *random class*. Figural Creativity Test was used to measure creative thinking potential of participants on four elements. *Spearman rho* was used to verify hypothesis. The correlation coefficient between mother's educational level and student's creative thinking at class XI of Christian Senior High School Salatiga is  $r = -0,028$  with a significance 0,771 ( $p < 0,05$ ) which means that there is no significant correlation between mother's educational level and student's creative thinking at class XI of Christian Senior High School Salatiga.

Keywords: *creative thinking, mother's education level, students, high school*
